Navigation Guide:

- ***Please Use the MarsProjecOlderArcPro.aprx for viewing data if needed and Default.GDB (Located inside the "Final Project" folder with all scripts) as the MarsProjecOlderArcPro.GDB has no outputs.***
- ***May have to Zip the file to download and will come in multiple parts, you do not need the 15 GB data table, so cancel that download.***
- ***All articles and other similar ones are in the deliverable folder as well thanks, let me know if you have questions.***
